Looking for new ways to spend time with your dog? Is fetch just a little too overdone? Is your furry friend's anxiety getting the better of them? Try putting on some Bob Marley. Studies have shown that classical music calms canine nerves, but did you know Rover may actually have his own taste in music? Recently, a study from the Scottish SPCA and the University of Glasgow, published in the journal Physiology and Behavior, concluded that dogs may have their own music preferences. And while pups tend to enjoy many genres, the most popular seem to be soft rock and reggae.

The study, which evaluated kennelled dogs’ preferences for soft rock, Motown, pop, reggae, and classical music, revealed that dogs spend significantly more time lying down and less time standing when any music plays. And while music didn’t seem to persuade the dogs to quit barking, the music plays. And while music didn’t seem to persuade the dogs to quit barking, the music was calming at first, after a week of listening to classical music, the dogs seemed to become disinterested in the tunes and their stress levels eventually increased. So, based on these newer findings, it seems as though a variety of music can keep your dog both interested and relaxed while they are kennelled.

In 2015, the University of Glasgow conducted a separate study that examined the effects classical music has on our canine friends. They originally found that, while the music was calming at first, after a week of listening to classical music, the dogs seemed to become disinterested in the tunes and their stress levels remained constant over the five-day study. Professor Neil Evans at the University of Glasgow suggested that this study may not represent the musical tastes of all dogs. “Overall,” he writes, “the response to different genres was mixed, highlighting the possibility that, like humans, our canine friends have their own individual music preferences.”

You’ve been involved in an accident and the insurance company isn’t playing ball, so you hire an attorney to handle your case. Once you hire an attorney to represent you and your interests in a personal injury claim, there are several steps your attorney will take on your behalf in order to maximize your compensation. While every case is different, generally speaking, a good personal injury attorney will do the following:

- Conduct initial background searches and investigatory measures to identify all parties and issues
- Conduct in-depth interviews with the client and witnesses
- Send out letters of representation to all involved parties
- Send out spoliation letters to involved parties, so all evidence related to your injury is preserved and protected
- Send out Freedom of Information Act Requests (FOIA) on your behalf
- Gather all medical records and billing associated with your injuries
- Work with an accident reconstructionist, if necessary, to reconstruct the collision using state-of-the-art imagery technology
- Capture downloads from the vehicle that caused your injuries, so we can determine what the adverse party was doing prior to and after the collision
- Gather photographs, diagrams, and any other relevant physical evidence that will assist with your claim
- Analyze insurance coverage to determine what compensation may be available
- Contact experts to conduct studies that will help present your claim favorably
- Craft a demand package which carefully analyzes and evaluates your injury claim
- Negotiate with the insurance company and their representation
- Draft a Plaintiff’s Original Petition and all related litigation documents in reference to the claim, if necessary
- Perfect service of lawsuit and associated discovery documents in reference to the claim, if necessary
- Draft and perfect trial strategy
- Prep client for giving deposition
- Prepare and attend pre-trial mediations, if necessary
- Formulate and perfect trial strategy
- Prep client for trial
- Negotiate all subrogation and liens filed by third parties in reference to client’s injuries

TESTIMONIALS

“Great customer service. Office staff is friendly and extremely helpful. William and Gayle were great and helped get a great outcome in our case. I would definitely recommend all family and friends to this office for assistance.”

- Lisa G.

“Will and Gayle were excellent! I recommend Herrman and Herrman to anyone who needs help with a personal injury case!”

- Martin H.

“They did a great job representing me. Especially with the help from Eddie Mejia and Sandy. They made this process very smooth and swift, and with class. I would highly recommend this office to anybody I know.”

- Gabriel H.

“Steven Stratso was my attorney. He was amazing and did an awesome job. I was definitely satisfied with the outcome working with him. I am definitely recommending him to all my friends and family.”

- Alexis M.

“A five-star law firm. I recommend Herrman and Herrman to anyone who needs help with a personal injury case!”

- Martin H.

“Don’t just take our word for it. See what others have said.”

SLOW COOKER RASPBERRY WHITE HOT CHOCOLATE

There’s nothing like curling up under a blanket with a warm mug and a novel that finally came out in paperback. Break out the slow cooker and let the sweet aroma waft through your living room as your start Chapter 1.

INGREDIENTS

- 1 cup white chocolate chips
- 14 ounces sweetened condensed milk
- 2 cups heavy cream, divided
- 3 cups milk (any variety will do)
- 1 teaspoon vanilla
- 4 tablespoons raspberry liqueur or syrup

INSTRUCTIONS

1. In a slow cooker, combine white chocolate chips, condensed milk, 1 cup cream, and milk. Cover and heat on low about 2 hours.
2. In a large bowl, mix remaining 1 cup cream, powdered sugar, and vanilla.
3. Using a hand or stand mixer, whip until stiff peaks form.
4. Serve mugs of hot chocolate with about 1 tablespoon of raspberry liqueur or syrup to taste and a dollop of whipped cream.
